Contribution from participant

1. ZACCA monitor the impact of climate change through the relevant authorities in order to reach to the community for the most opportune time.
2. When I bring the government's investment in the country must look at the relevant circumstances in order to avoid an impact which would occur later.
3. ZACCA be around to advise the government on the prevention and to use of natural wood disposal for firewood and charcoal, instead using standardized way to reduce excessive consumption of firewood and charcoal, and encourage communities to plant trees so that it can be used later to leave the natural benefits current and future generations.
4. ZACCA visit regularly in the media to sensitize the community, as well as visiting many villages as is the impact occurs.
5. ZACCA setting bonanza for children to keep awareness of children laid on conservation of the environment.
