

PLANTING TREES REPORT AT DONGE MNYIMBI VILLAGE, UNGUJA,

3 JUNE, 2017

Implementation of Local adaptation plan for action (LAPA) for planting trees

1.0 Introduction

Zanzibar climate change alliance (ZACCA) in collaboration with NGOs/CBOs and the village people from Donge Mnyimbi North District Unguja. Conducted one day activities which held on 3st June 2017, for Planting tree along the catchment area called Mwembe Mapapai dam, the trees planting species was Terminalia (mikungu), and Canophila inofila (mitondoo) about 250 trees planted, this activities involve 24 participation form ZACCA members, journalist, and villagers of Donge Mnyimbi. The aim of this is to emphasize people to planting trees so as to minimize the impact of climate change and make good environment for present and future generation,

2.0 Purpose of planting trees

- To overcome problem faced sources of water become dry, because the catchment area face this problem, this situation of plating tress near the sources of water it reduce high evaporation on water to become dry and also increased the amount of water.
- To inform the communities on environmental conservation and the importance of planting trees
- To showing the action of soil and water grew a lot lose fertility land
- Planting of tress is one part of the implementation of the project for Action for Strengthening Capacity of Civil Society Organizations on Climate Change Governance and Accountability in Zanzibar
